CODATA, 2006, Beijing

#### **Animal Species Database of China**

JI, Li-Qiang Institute of Zoology, CAS Beijing, China

#### Contents

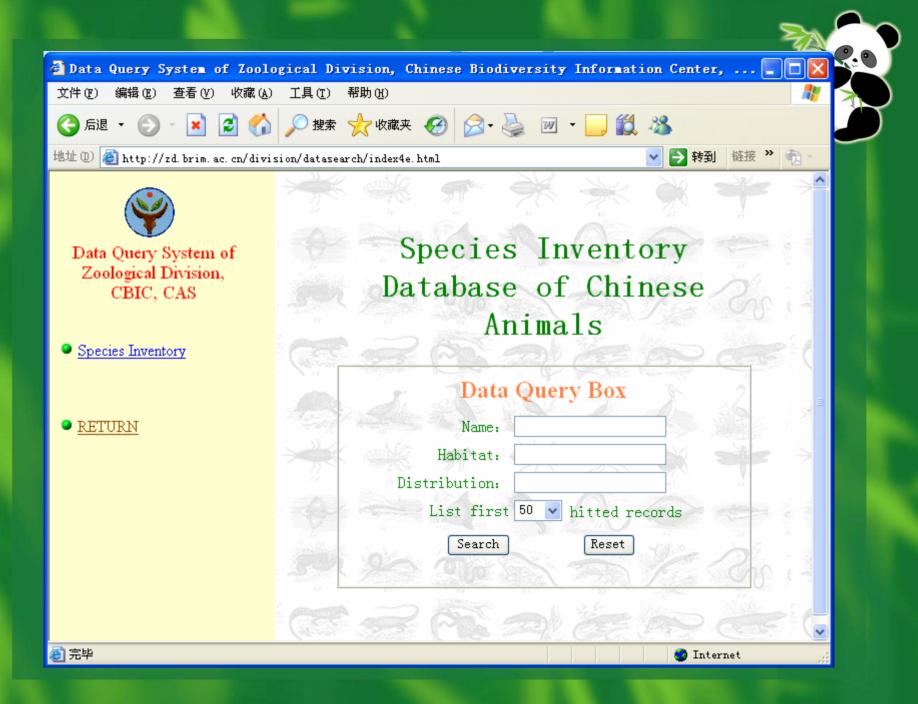

- Animal species inventory database of China
- New species and type specimen database
- Animal name database
- Endangered animal database
- Web of China animal species part

Integration for Species 2000 China Hub

# Animal Species Inventory database of China

- Supported by BRIM project
- Beginning from 1991
- Inventory information of all animals distributed in China
- Collected data from scientists (butterfly, beetle, etc.), monographs (bird, mammal, etc.)
- Form framework of species database
- One of most important database in CBIS, Initiate the CBIS database system
- 19500 species and subspecies of vertebrate and insect by 2001

- 🔜 🎎 🦓

Query Result of Species Inventory Database

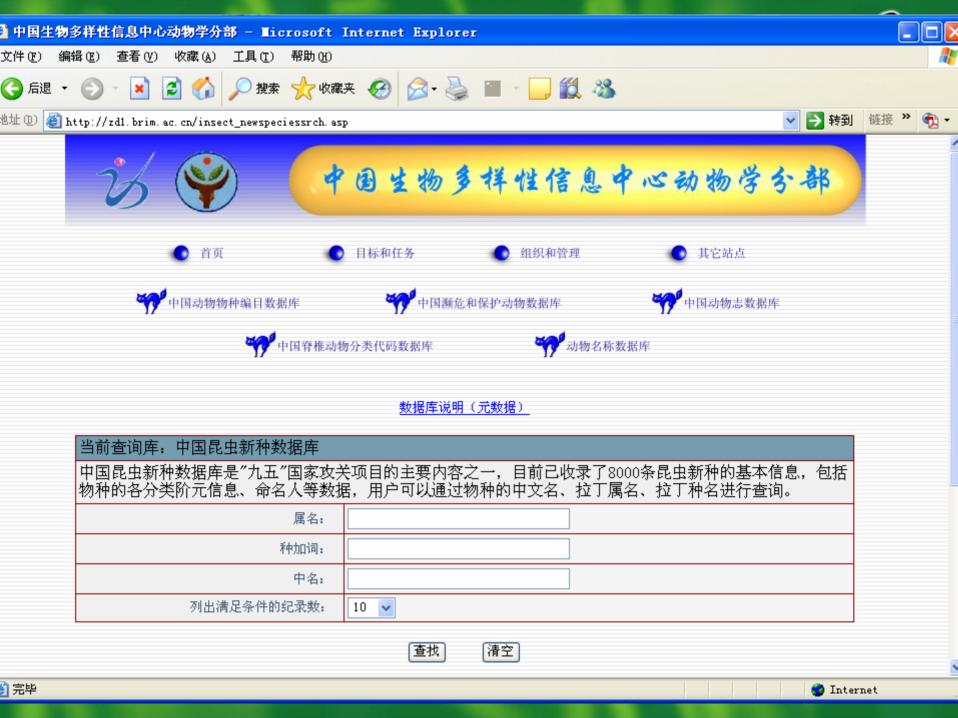

#### Zoological CAS

Order	CARNIVORA
Family	Ailuropodidae
Scientific Name	Ailuropoda melanoleuca
Author	(David, 1869)
Original Genus	
Original Literature	Nouv. Arch. Mus. H.N. Paris, 5
Type Specimen ) from	Baoxing, Sichuan
English Name	Giant Panda
a name day	mainly roosting at 1400-3500 m ASL, diducious broadleaved forests, broadleaved-coniferous mixed forests and moutane bamboo forests in subalpine coniferous forests zone
Habitat Highest altitude	broadleaved-coniferous mixed forests and moutane bamboo forests in
Highest	broadleaved-coniferous mixed forests and moutane bamboo forests in
Highest altitude Lowest altitude	broadleaved-coniferous mixed forests and moutane bamboo forests in
Highest altitude	broadleaved-coniferous mixed forests and moutane bamboo forests in subalpine coniferous forests zone
Highest altitude Lowest altitude Endemic Domestic distribution Abroad	broadleaved-coniferous mixed forests and moutane bamboo forests in subalpine coniferous forests zone
Highest altitude Lowest altitude Endemic Domestic	broadleaved-coniferous mixed forests and moutane bamboo forests in subalpine coniferous forests zone

## New Species and Type Speciment

- Supported by MOST state key project data sharing for sustainable development
- Species and type specimen information of animals found in China in last 50 years and published in Chinese

 Collected from journal papers - 6 most famous journals for taxonomy in China
 8000 species and 10000 type specimen

## Endangered Animal Database

- Funded by CAS and MOST from 1991
- Collect information from monographs, such as Red Book of China Endangered Animals, etc.
- Contain species name, common name, product name, English name, endangered category, protected category, threatening factor, protecting measurement, picture, etc.
- About 600 records

中国濒危与保护动物数据库查询结果

物种代码	01105000202
中文名	羚牛四川亚种
拉丁名	Budorcas taxicolor tibetana
俗名	扭角羚,藏牛羚,盘羊,盘头羊,野牛,封牛,山牛,野山牛,食盐兽,魏,竹牛,勒依尼,弄
商品名	
英文名	Sichuan Takin
CITES公约附录	附录II
IUCN等级	资料不足
红皮书等级	濒危
国家保护等级	一级
濒危原因	作为食物被捕猎,过度捕猎,栖息地破坏,种群隔离
保护措施	保护行动计划
备注	
图片1	
图片2	

### Animal Name Database

- Names about animals in the world
- Collected from dictionaries and monographs
- More than 74,000 records
- Containing scientific name, Chinese name, English name, publishing year and author
- Including Vertebrate and invertebrate

表明,嘴长及嘴高、枕部黑环宽度均符合上述范围,而对云南 tenuirostris 分布区内采获的标本(22个)测定 结果,则变异范围甚大,嘴长与 diffuses 几无差别,嘴高9.4(8—11)mm,枕部黑环在一些幼鸟标本(4个)尚 未显露,而有黑枕者为10.7(4—16)mm,变异范围甚大,与普通亚种重叠。此外,在四川成都、秀山5—7月采 到的 diffuses 标本,有的黑枕环宽度为6—8mm。因而猜测云南(以及四川部分地区)主要是这二个亚种分布的 间渡区,混有相当多的居间类型。所以 tenuirostris 在云南的实际分布区,尚需进一步研究查证。		
<b>亚种分化</b> 黑枕黄鹂有25个亚种,中国有2个亚种。		

## Integration for SP2000

- Species inventory Web of China Animal (WCA): good framework, some empty branch in insect and invertebrate animal
- New species (NSD): almost cover all orders of insect, type in China
- Name database (AND): all names (Ver. & Inver.) in different levels of taxa, but only names with Chinese name
- Endangered (ENAD): common name and picture

**Species 2000 China Hub** - animal species database of China Database resources - assessment based on CBIS databases Taxonomist group - major selected from authors of Fauna of China IT group - CBIS technical team Soint group (team?) - with plant and microorganism part Standard dataset – from CBIS to Species 2000

#### Standard Dataset for animal species database of China

- 1. Accepted Scientific Name with References (WCA, NSD, AND)
- 2. Synonyms with References (WCA, NSD)
- 3. Common Names with References (ENAD, WCA)
- 4. Latest taxonomic scrutiny ()
- 5. Source Database ()
- 6. Additional Data (description from WCA, picture from ENAD)
- 7. Family name (WCA, NSD, AND)
- 8. Classification above family, and highest taxon (WCA, NSD)
- 9. Distribution (WCA, NSD)
- 10. References ()
