Data Grid Infrastructure for YBJ-ARGO Cosmic-Ray Project

Gang CHEN, Hongmei ZHANG - IHEP

CODATA'06

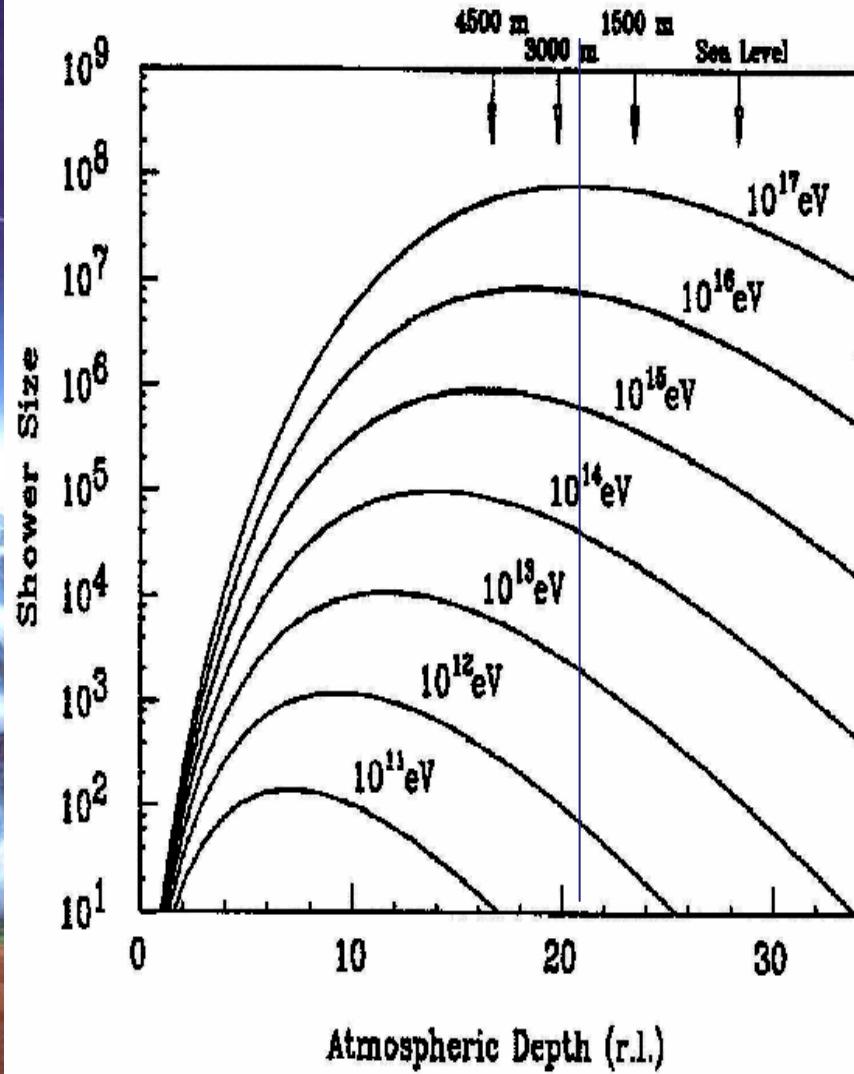

24 October 2006, Beijing

FP6-2004-Infrastructures-6-SSA-026634

Extensive Air Shower

Main Physics Goals

90°31'50" E, 30°6'38" N
4300m a. s. l., 606g/cm²

- ▶ **γ -astronomy (Sub-TeV, 0.3I_{Crab})**
- ▶ **Diffused γ sources (Sub-TeV)**
- ▶ **GRB (10GeV)**
- ▶ **Knee Physics**
- ▶ **Anti-p/p (300GeV)**
- ▶ **Primary Proton Spectrum (10TeV)**
- ▶ **Solar Physics**

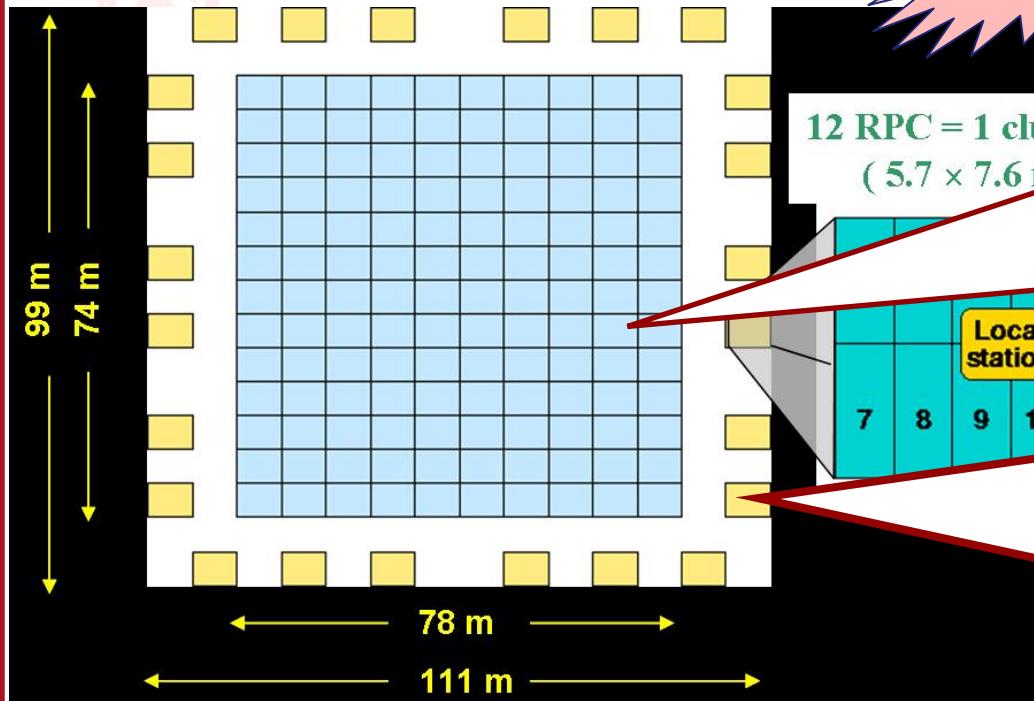

YBJ-ARGO

- ▶ Italy-China cosmic ray observatories in Tibet.
- ▶ 200TB raw data per year.
- ▶ Data transferred to IHEP and INFN.
- ▶ Rec. data accessible by collaborators.

YBJ-ARGO Experiment

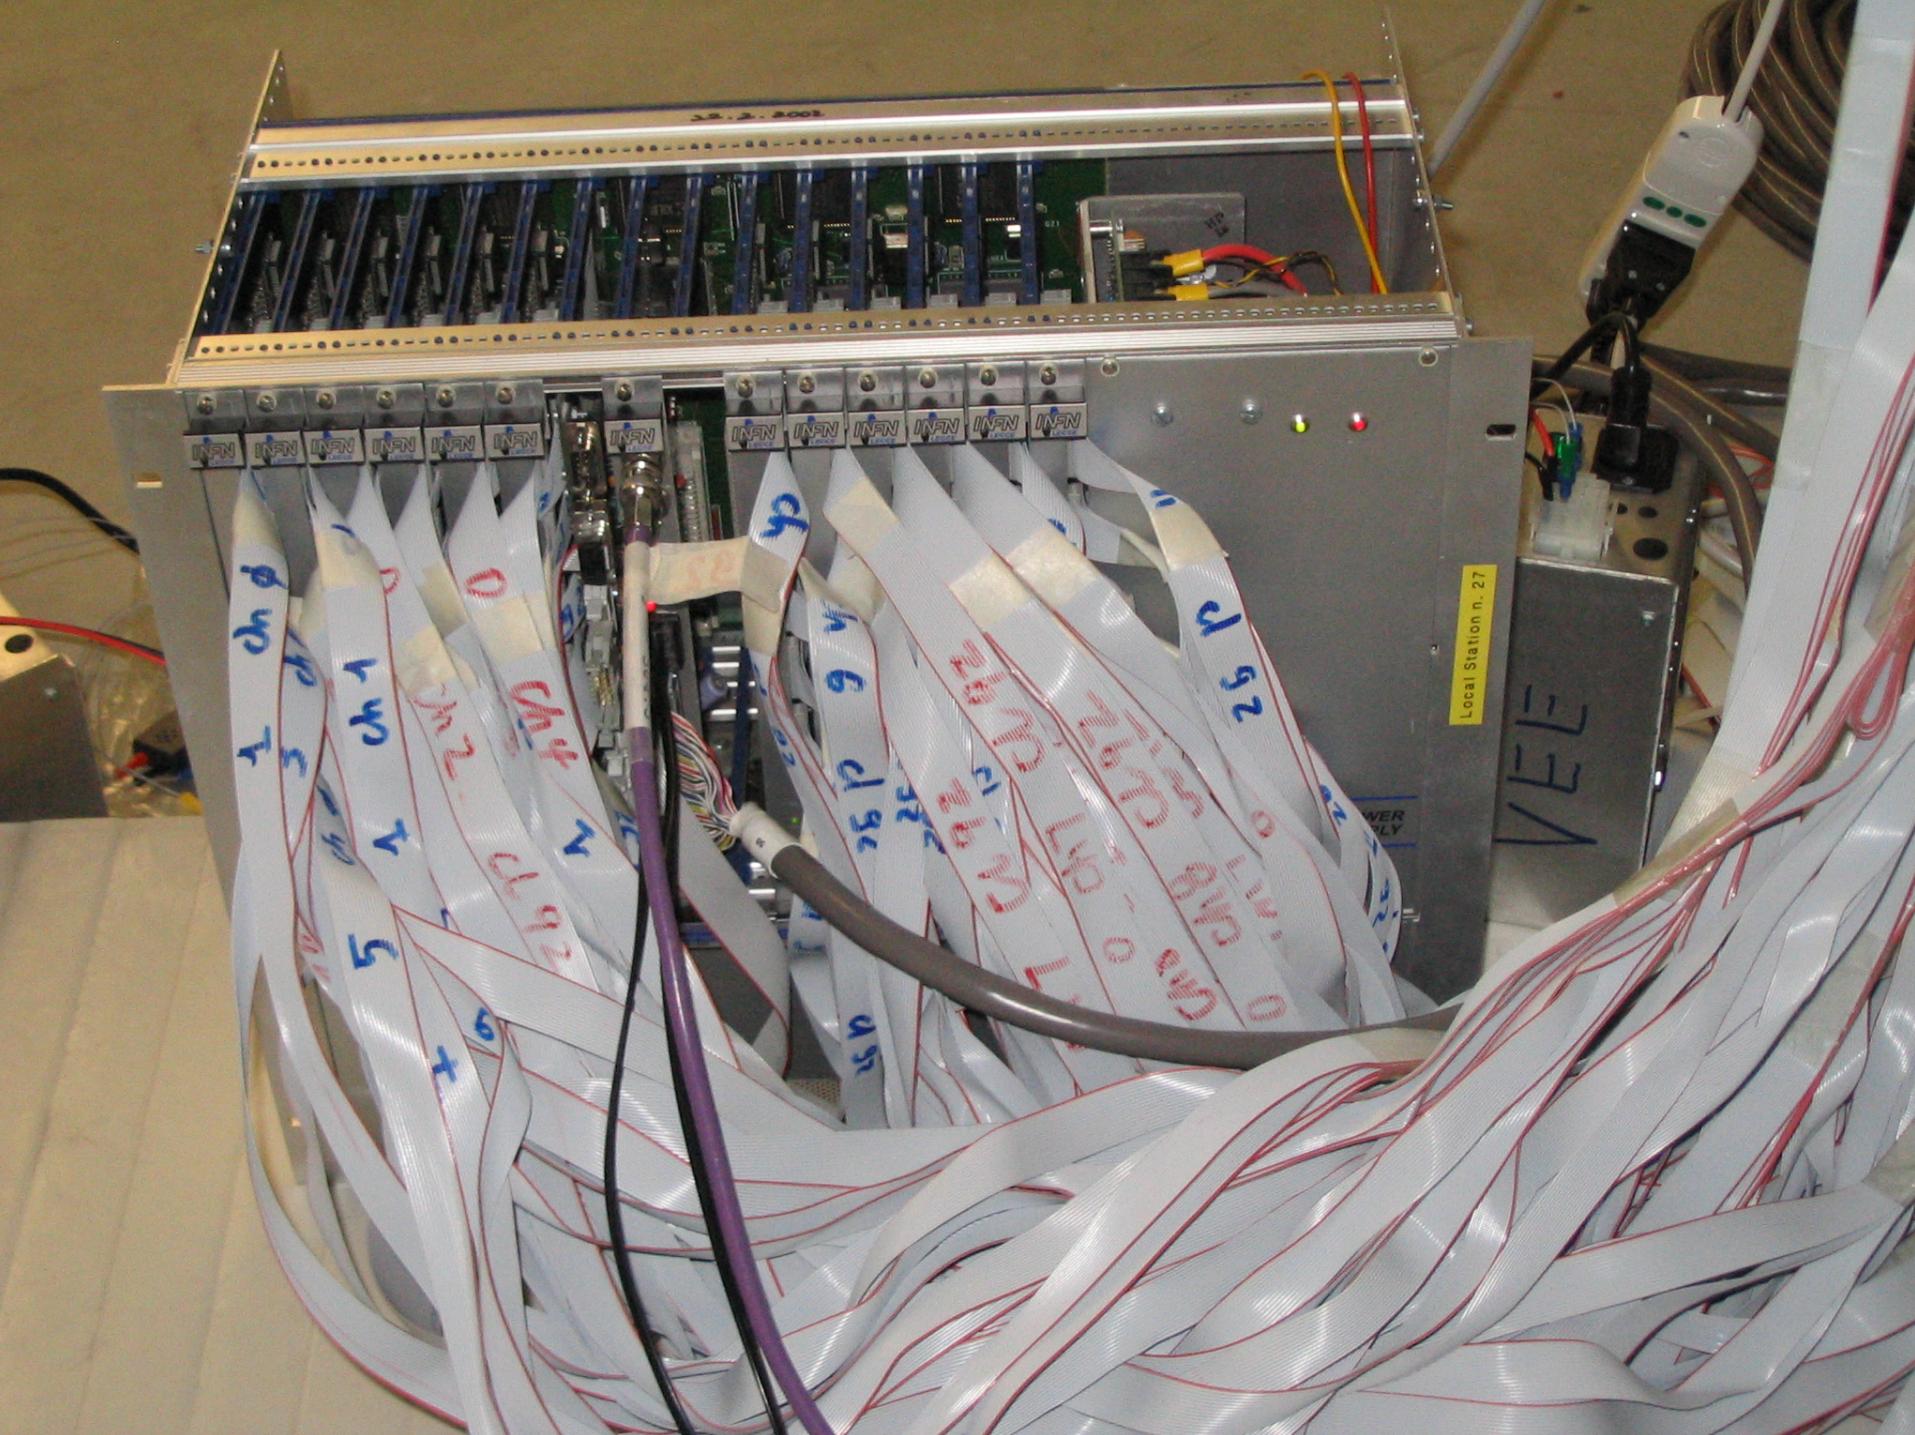

Full Coverage

- Full coverage carpet
- 78x75m² (130 clusters)
(95 % of active surface)
- Operating and taking data since July 2006.

- Guard ring surrounding the central carpet
- 111 x 99 m² (24 clusters)
- (20 % of active surface)
- Completed by the end of 2006.

- ▶ 154 CLUSTERS, 18480 PADs
- ▶ Total detector area: 6500 m²
- ▶ Angular Resolution 0.5° (nhit>50)
- ▶ Measurement: time, number

INFN INFN INFN INFN INFN INFN INFN INFN INFN

Data Process and Physics Analysis

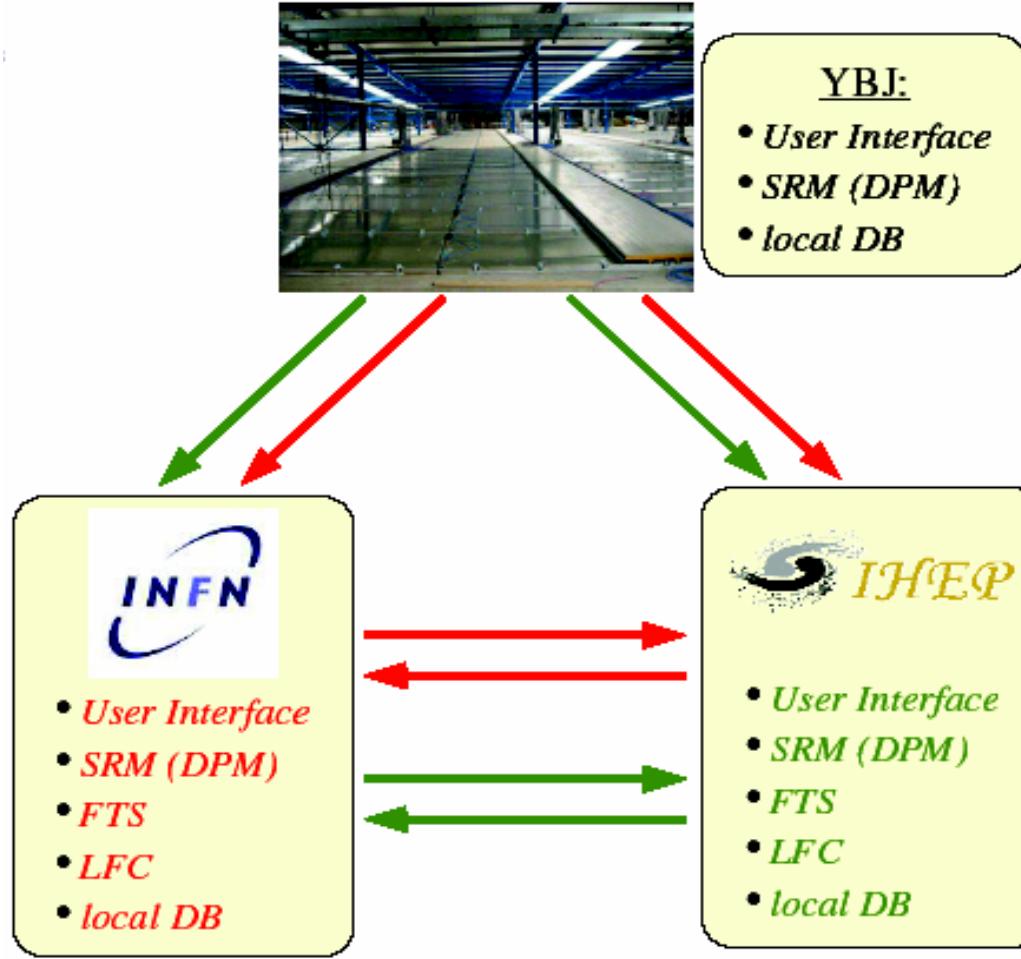

Detector

New ARGO-YBJ GRID computing model

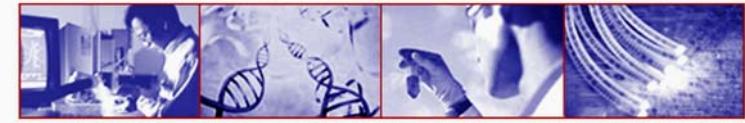

- ▶ Resources integration for data processing
- ▶ Use GRID tools for an automatic data transfer system
- ▶ Data storage : keep a copy of the raw and processed data in each main computing centre (IHEP and CNAF)
 - backup
- ▶ Use “synchronized” Data Catalogues
- ▶ Use “synchronized” Metadata Catalogues
- ▶ Use one ARGO Data Base and replicated copy
- ▶ Same policy for Monte Carlo production

Data Transfer schema

Testbed for data transfer project

- ▶ The GRID middleware based on gLite installed
- ▶ Data transfer from DAQ to YBJ Data Mover, use of a local DB
- ▶ File Transfer via FTS to IHEP and insert in the data catalog,
- ▶ Data synchronization to CNAF via data catalog comparison
- ▶ The mechanism to delete the data files at origin (YBJ), once transferred to both computing centers, was implemented

Certificate Management

Here is a tutorial of certificate management. We'll teach you how to export your certificate and private key from your browser and how to transform certificate format for more usage.

When you apply for your certificate by online generating Certificate Sign Request, the private key is stored in encrypted form on your browser. After downloading the certificate, the private key is added with the certificate. We recommend that you copy your certificate and private key to removable media which should be kept in safe.

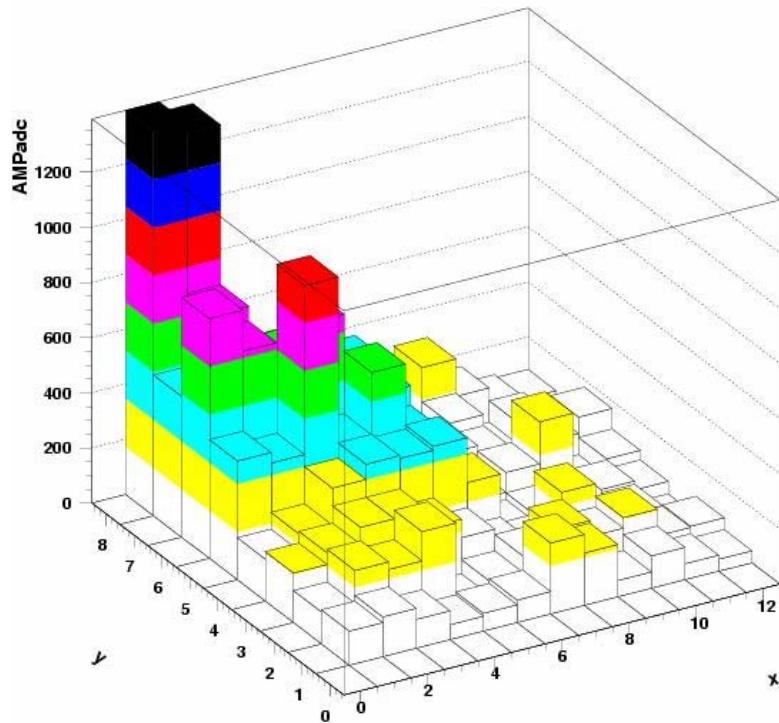

Exporting the digital certificate with the private key from IE

● Open the IE browser, choice the "Tools" menu, click "Internet Options".
 ● Click the "Content" tab, then choose "Certificates".
 ● Click your certificate that you want to export.
 ● Click the "Export" button
 ● Click "Next" in the "Export Wizard" window
 ● Select "Export private key". Click "Next"
 ● Make sure "Personal Information Exchange -PKCS#12" is checked, and also the "Enable strong protection".
 The "Delete private key if successful" must be unchecked. The "Include all certificate in path" button should be unchecked, too. Click "Next".
 ● Type the passphrase(twice) that you use to protect your private key. We recommend you choice 8 characters pass phrase. Click "Next".

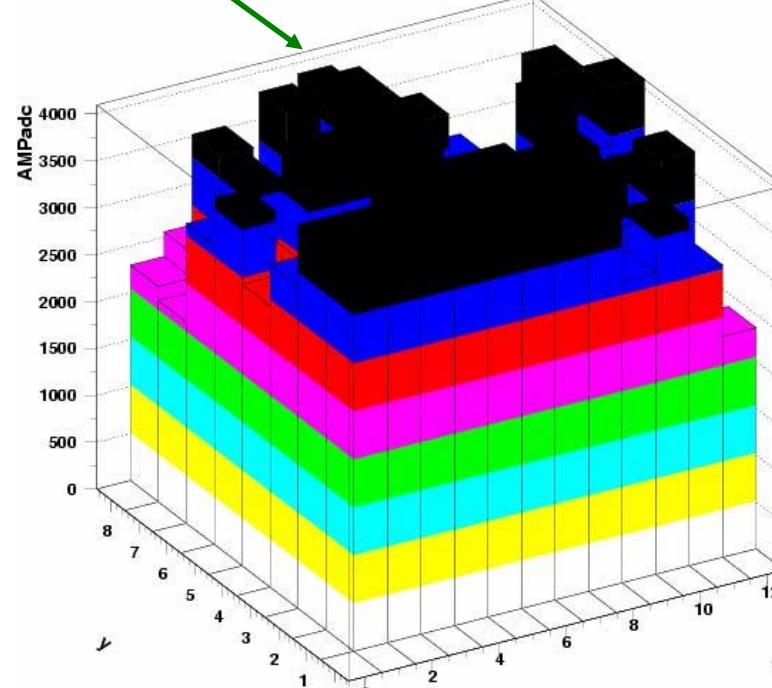

★ Interconnection & Interoperability of Grids between Europe & China ★

Some events...

4000 ADC counts $\sim 90 \text{ p/m}^2$

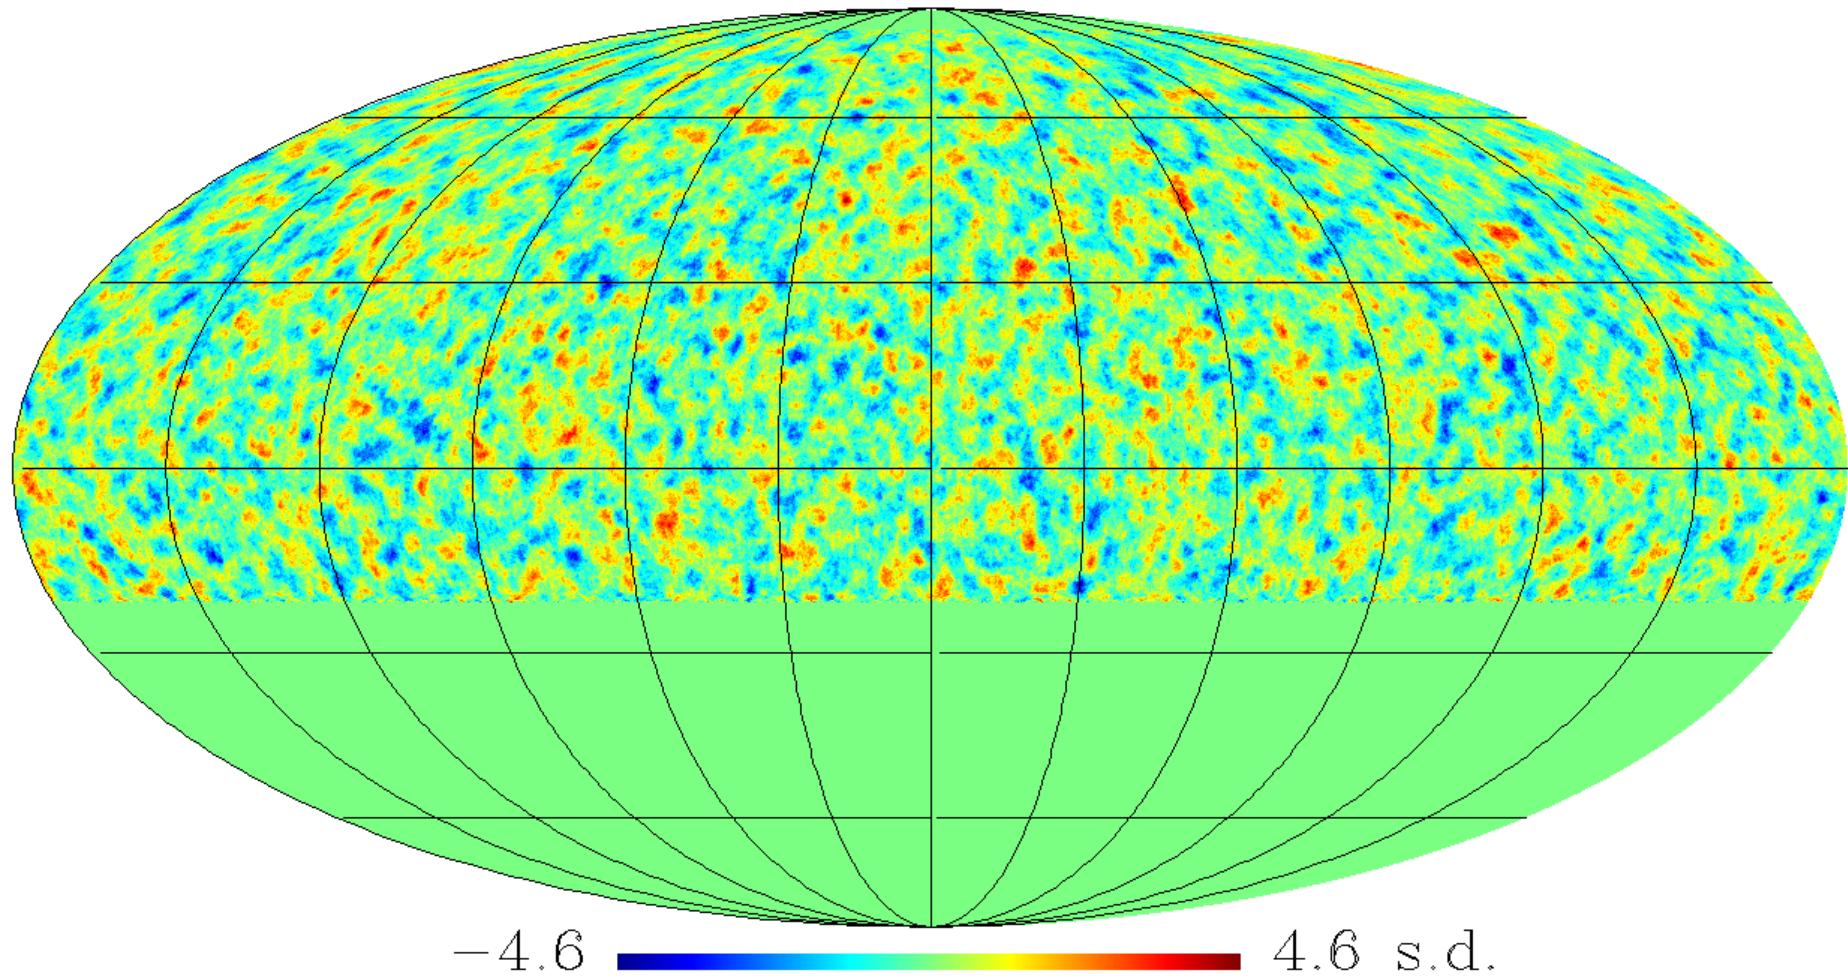

Very big shower !!

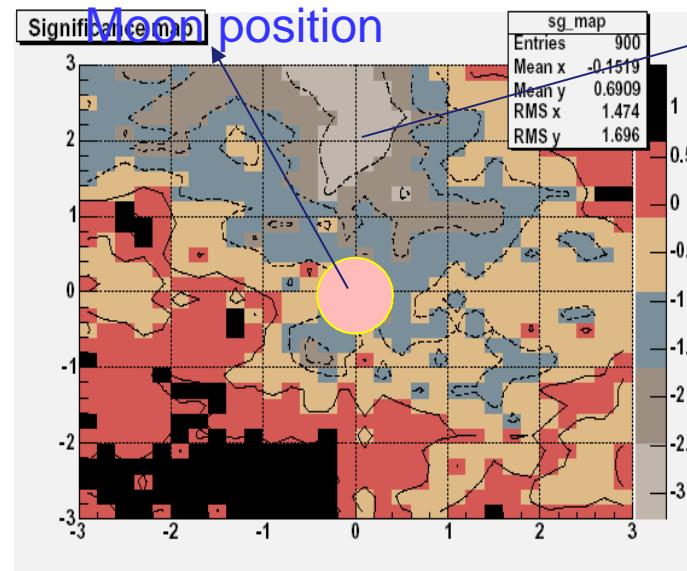

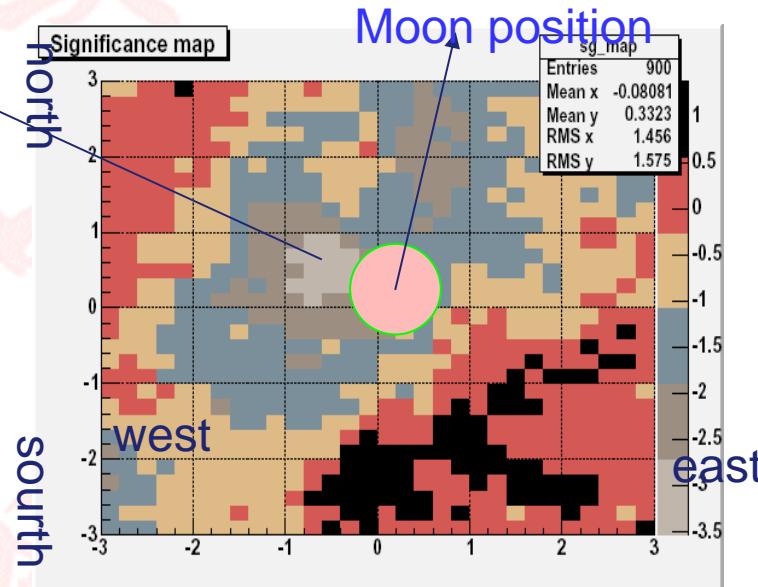

ARGO skymap

Smooth window radius = 1.5°

Moon shadows (zenith <40°)

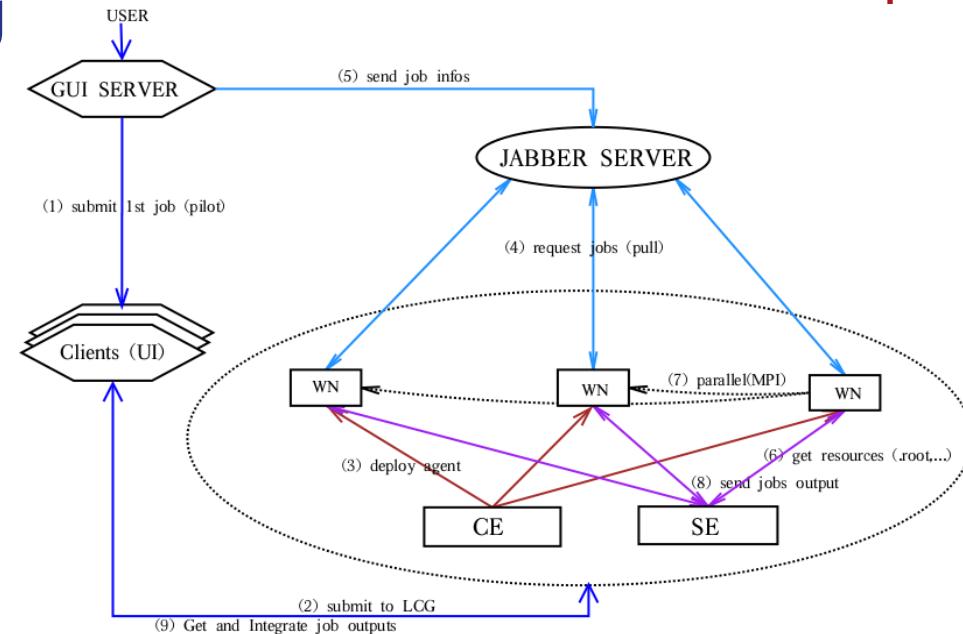

- The left histogram is for the 1st reconstruction: events: 536165 background: 537473, difference: 1309 ± 733 (stat.) $\pm ?$ (sys.), expected deficit number : $3168(\sim \text{Nb g} \times \pi (\text{Moon Radius})^2 / (6 \times 6))$
- The right histogram is for the 2nd reconstruction: events: 539039, background: 540060, difference: 1021 ± 734 (stat.) $\pm ?$ (sys), expected deficit number : $3178(\sim \text{Nb g} \times \pi (\text{Moon Radius})^2 / (6 \times 6))$

Next developments

- ▶ API for the data transfer procedure and more automatization of the whole procedure
- ▶ Use of the ARGO GRID infrastructure in Italy and China

New Job submitting and monitoring

- ▶ GUI for job submitting in batch mode
- ▶ Dataset Selection
- ▶
