

Data Resources and Services at Chinese Astronomical Data Center

Chenzhou Cui and Boliang He,
National Astronomical Observatory of China

Chinese Astronomical Data Center (CASDC) is a member of World Data System, hosted at the National Astronomical Observatory of China. The CASDC keeps close collaboration with CODATA, WDS and the International Virtual Observatory Alliance (IVOA). Data resources and services at the CASDC will be introduced. More information about the CASDC is available at its website: <http://casdc.china-vo.org/>

Keywords: data management, data access, interoperability, virtual observatory
