Roundtable Discussion:

In preparation for this meeting the following questions should be considered by participants for discussion:

- 1) What do you see as the major challenges within the French scientific community regarding scientific data management and access?
- 2) Are there activities currently taking place within the French scientific community that directly relate to the Agenda for Action that came from Geneva?
- 3) What issues and accomplishments do you think are the most important to highlight at the WSIS in Tunis?
- 4) What is the **key** message that French scientific community would like to convey to delegations at the Summit?
